

EXREprotein™

EXceptional REcombinant Proteins
EXceptional REagents
EXceptional REsults

PROTEINS & GROWTH FACTORS

HIGH BIOACTIVITY

LOW ENDOTOXIN

HIGH PURITY

EXperienced and REsponsive.

Our team of doctorate-level scientists have worked alongside researchers in academia and industry to bring new ideas to product development, industry standards to quality control and scientific insights to product support.

Our recombinant cytokines support a wide range of cell types, including stem cells, neural cells, immune cells, and organoids.

All proteins designed & manufactured at our facility in Minneapolis, MN, USA

Strict control of each process: protein design, purification, QC testing & bottling

Superior lot-to-lot consistency

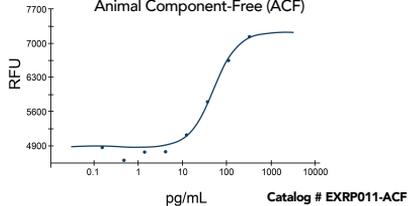

E. coli and mammalian expression systems

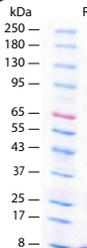

Animal component-free (ACF) proteins available

Biological Activity: Recombinant Human EGF
Animal Component-Free (ACF)

Determined by a cell proliferation assay using BALB/c 3T3 mouse fibroblast cells. The ED₅₀ for this effect is typically <100 pg/mL.

Purity: Recombinant Human EGF
Animal Component-Free (ACF)

2 µg/lane on SDS-PAGE under reducing (R) conditions. The gel was stained using Coomassie® Blue showing a single band at 6 kDa and purity greater than 97%.

PROTEINS & GROWTH FACTORS

Why Choose EXREprotein?

We set high standards for our recombinant proteins, cytokines, and growth factors that are all developed in-house. We know you have high standards for the proteins used in your bioassays and cell culture.

Cytokines & Growth Factors

Perfectly Suited For Immunology, Stem Cells, Cell Therapy, Cancer Cell Biology & More.

| | | | |
|-----------|-----------|-----------|-------------|
| EGF | IFN-gamma | IL-7 | M-CSF |
| FGF-basic | IL-1 beta | IL-15 | PDGF-BB |
| FGF-10 | IL-2 | KGF/FGF-7 | R-Spondin 1 |
| GM-CF | IL-6 | LIF | TNF-alpha |

TOOLS FOR YOUR RESEARCH

Find products to move your projects forward.

Enjoy fast and easy ordering.

EXREprotein™

"At each step of product development, we discuss how the customer experience can be maximized."

HIGH BIOACTIVITY

LOW ENDOTOXIN

HIGH PURITY

Flexible Sizes

For All Project Sizes & Budgets

Up to 7 pack sizes available.

2 µg to 1 mg

Need more than 1 mg? Request a bulk quote

***Custom services:** custom sequence, expression, modifications, labels, etc.
